CANCER
IN A
COLD CLIMATE

Our book: '**CANCER IN A COLD CLIMATE: the Shafting of St Luke's Hospital**' exposes how St Luke's was shafted - how unaccountably low marks were given by 'experts' to St Luke's, how a key expert report never made the Minister's desk and how FF and Green TDs waxed lyrically about Luke's yet voted to close it. Patients and their families, in their own words, explain why this proven centre of excellence should not be closed.

The book explains that the new "state of the art" cancer unit due to open shortly at James's is an outpatients centre with no beds and no catering for patients. This is Minister Harney's replacement for St Luke's! She did not consult patients and indeed ignored a petition with 150,000 signatures presented to her by our Campaign.

The book costs €15 and has an introduction from Ulick O'Connor. It is distributed by Easons. Ask in your

local bookshop/library, or order online from the publishers at www.originalwriting.ie or from the Campaign at **087 6395790**.
